Introduction

Overview

The Microsoft Teams Replica is a web-based collaboration platform designed to enable users to communicate, collaborate, and organize work within teams. The application provides essential features such as user authentication, messaging, team management, file sharing, and online meetings.

Features

Authentication & User Management

- User registration
- User login
- User profile management

Chat

- One-to-one chat
- Group chat
- Send images and files

Teams & Channels

- Create teams
- Join teams
- Create channels
- Channel messaging

Meetings

- Create and join meetings
- Audio and video calls

File Management

- Upload files
- Download files
- Share files

Admin Dashboard

- Manage users
- Manage team

Technology Stack

Component	Technology
Frontend	React.js, HTML, CSS, JavaScript
Backend	Node.js, Express.js
Database	MongoDB
Authentication	JWT
Real-Time Communication	Socket.IO

Database Collections

- Users
- Teams
- Channels
- Messages
- Meetings
- Files

Advantages

- Easy team communication
- Centralized collaboration
- Secure file sharing
- Simple team management
- Real-time messaging

Future Enhancements

- Screen sharing
- Meeting recording
- Mobile application
- AI assistant
- Push notifications

Conclusion

This project provides a simple collaboration platform inspired by Microsoft Teams. It enables users to communicate through chats, organize teams, conduct meetings, and share files efficiently, making it suitable for educational institutions and small organizations.
