

Corporate Employee Self-Service (ESS) Portal

1. Introduction

The Corporate Employee Self-Service (ESS) Portal is a web-based platform that helps employees and HR departments manage workplace activities efficiently. It provides a centralized system for attendance tracking, leave management, payroll access, employee information, and support services.

2. Objectives

- Automate HR processes.
- Reduce paperwork and manual effort.
- Improve employee experience.
- Provide secure access to employee records.
- Ensure transparent leave and attendance management.

3. User Roles

- Employee
- Manager
- HR Executive
- Payroll Officer
- System Administrator
- Department Head

4. Main Modules

- Employee Dashboard
- Leave Management
- Attendance Tracking
- Payroll & Payslips
- Employee Directory
- Performance Management
- Training Portal
- Helpdesk & Support

5. Key Features

Employee Dashboard

Provides personal profile details, attendance summary, leave balance, salary overview, notifications, and company announcements.

Leave Management

Employees can apply for leave, track leave history, check leave balances, and receive approval updates.

Attendance Management

Tracks daily attendance, work hours, overtime, and generates attendance reports.

Payroll Management

Allows employees to view salary details, tax deductions, reimbursements, and download payslips.

Performance Management

Supports goal setting, KPI tracking, performance reviews, and manager feedback.

Training Portal

Provides access to courses, certifications, training schedules, and skill development tracking.

Helpdesk System

Allows employees to raise support tickets for HR or IT-related issues.

6. Security Features

- Role-Based Access Control (RBAC)
- Multi-Factor Authentication (MFA)
- Encrypted Data Storage
- Audit Logs
- Secure Session Management

7. Technology Stack

Frontend: Next.js, React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MySQL / PostgreSQL

Authentication: Firebase Auth or JWT

Cloud Platform: AWS, Azure, or Vercel

8. Database Tables

- Employees
- Departments
- Attendance
- Leaves
- Payroll
- Payslips
- Performance
- Training
- Tickets
- Announcements

9. Future Enhancements

- AI Chatbot Assistant
- Predictive Analytics
- Employee Sentiment Analysis
- Mobile Application
- HR Automation Workflows

10. Conclusion

The Employee Self-Service Portal simplifies HR operations by providing a centralized platform for employee and management activities. It improves efficiency, transparency, and employee engagement while reducing administrative workload.
